Mistras provide City and Guilds trained and certified confined space site management teams with well established company procedures and documentation meeting UK HSE recommendations and Confined Space Regulations 1997.

We assess, prepare and monitor all types of industrial confined spaces to allow you to carry out your work safely and effectively. We evaluate your project needs at an early stage and provide and maintain your workforce with all necessary safety equipment such as radios, escape sets, tripods, gas monitors, lighting and entry systems.

For medium (NC3) and high risk (NC4) confined spaces, Mistras also provide dedicated highly trained on-site rescue and emergency first aid teams to ensure rapid extraction of casualties and emergency management, all of which are practised on-site with drills. Our services are tailored to your specific confined space, the duration of work, its location, the number of confined space operatives and the tasks/risks involved in your work.

Working in high risk, safety critical, high profile environments...

Mistras provide City and Guilds trained and certified confined space site management teams with well established company procedures and documentation meeting UK HSE recommendations and Confined Space Regulations 1997.
